FINAL REPORT/PROJECT CLOSEOUT

Project No.: D48-640
DRS A&I #023122

Client: Jessie Mae Cooper

Counselor: Nancy J. Mayo

Project: Workstation Modification for Textile Worker

The client suffered a tear of the right Achilles tendon while working at E&B Carpets as a roll-end packager. Client has been through physical rehabilitation process. Her physician states that she is able to go back to work if she stays off her feet for the majority of the day.

CRT was asked to examine ways in which the client can perform the roll-end packaging job while sitting. (The job presently requires standing most of the time.)

A. J. Bradshaw of the CRT travelled to Dalton to examine worksite and to discuss the case with client, counselor, and employer. It was determined that the worksite could be arranged in such a way that the client could perform all aspects of job while sitting.

Plans for the new workstation were designed and mailed to Mr. Boyd Pugh of E&B Carpets.

CRT was later notified that the roll-end packaging job had been combined with another job. This new job was impossible for the client to perform. The client was to be evaluated for a sitting inspection job.

This project is complete and can now be closed.
